

Road Star - Exhaust & Intake Manifold

For some reason this question comes up every few weeks and I never seem to be able to remember the numbers... Well now I know where to find them!

Fel-Pro 23588 These fit fine on all models without trimin'

If you can't find the 23588 get the **Fel-Pro 23561**... These will require a little grinding on the outside circumference as they are slightly oversized. (I got 'em in my bike now)

Here is the Napa o-ring part number for the intake manifold: # **BK 7272136**
